PORTFOLIO | GITHUB | LINKEDIN

EDUCATION

UNIVERSIDAD TECNOLGICA DE MXICO

February 2022 - August 2024

SOFTWARE ENGINEER BACHELORS

Calle Nte. 67 2346, San Salvador Xochimanca, Azcapotzalco, 02870

Ciudad de Mxico, CDMX

Percentage: 100%

EXPERIENCE

ADRYO A.I | FULL STACK DEVELOPER

Av. de la Alborada 124, Alcaldia, Tlalpan, 14010 Ciudad de Mxico,

CDMX | February 2025 – Present

Led Front-End development for the Xperience CEM platform while supporting Back-End teams in full-stack module implementation, improving UI/UX, performance, and data integrity across 100k+ records.

Delivered full-stack features by coordinating React, Node.js, and TypeScript workflows, reducing downtime by 30% and strengthening system reliability.

Designed and implemented a production-grade Redis authentication service to unify session management between Xperience and Adryo AI.

Improved scalability, security, and platform stability, supporting growth from 500 to 2k+ active users and increasing operational efficiency by 25%.

DRAGONCEM | FULL STACK DEVELOPER

RO NAZAS 42, Int. 402, COL. CUAUHTMOC, C.P. 06500, CD MX |

February 2022 – December 2024

- Built a CRM system that improved lead response time by 40% and increased sales closing speed by 15%.
- Managed the full product lifecycle: design, implementation, deployment, and continuous improvement.
- Improved team efficiency by 25% through documentation, guidelines, and process standardization.

SKILLS

PROGRAMMING LANGUAGES

JavaScript, TypeScript, PHP, CSS, SCSS, Go

LIBRARIES/Frameworks

Node, React, Angular, Redux, Tailwind, Bootstrap, Sequelize, TypeORM, Vite, NPM, Redis, Redis Cloud

TOOLS / PLATFORMS

Git, Docker, GitHub, VS Code, Linux

DATABASES

SQL, MongoDB

PROJECTS / OPEN-SOURCE

XPERIENCE CEM | LINK

JavaScript, TypeScript, React, Node.js, SQL, MongoDB, Nest, Python, Docker,

AWS

Developed reusable Front-End components, routing, authentication, caching layers, and performance optimizations. Contributed to API reliability through CRUD endpoints and bug fixes.

CRM DEALIDER | LINK

JavaScript, React, Node.js, SQL, Redux Toolkit Query, Tailwind

Led Front-End architecture using React and clean-code practices. Built reporting dashboards, real-time messaging modules, and automated WhatsApp bot workflows using Twilio and Gupshup.

LEADCEM | LINK

JavaScript, TypeScript, React, Node.js, SQL, MongoDB, Nest, Python, Docker, AWS

Contributed with reusable components, routing, authentication, and back-end CRUD endpoint implementations.

DRAGONCEM | [Link](#)

JSON, PHP, JavaScript

Implemented JSON-based automation bots integrated with Twilio and Gupshup. Contributed to website development and messaging workflows.
